Welcome to the Waffleweb docs!

Waffleweb is a WSGI Python web framework for making scalable websites easily. Waffleweb is highly customizable and doesn't force any project layout.

To get started you should go to [Getting Started](#). For How-to guides you can go to [How-to Guides](#). If you are looking for something specific you can go to the [Internals](#) Section.

CONTENTS

1. **Getting Started**

- 1.1. Installation Guide
- 1.2. The Basics

2. **How-To Guides**

- 2.1. The Request Object
